SCIENCE GIRLS

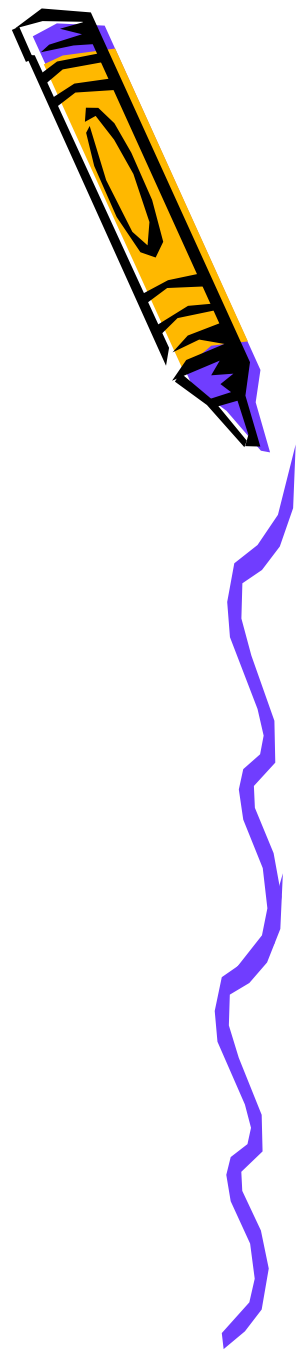

# Let's continue our journey through Science!

- What comes to your mind, when you hear the word "Scientist"?

A scientist is someone who wears a lab coat 24/7, right?

Who speaks in a language the public can't understand,

and who's a nerd to  
the  $n$ -th degree?

And, of course, scientists are often male...

# DO YOU AGREE?

# We thought so too, until joined the project "ScienceGirls"

# Why we wanted to become a ScienceGirl

- This project is changing our mind, makes us take a deeper look into what "Science" really is.
- We learn, meet new challenges, share our feelings and new experience with friends, families, community and **YOU!** 😊

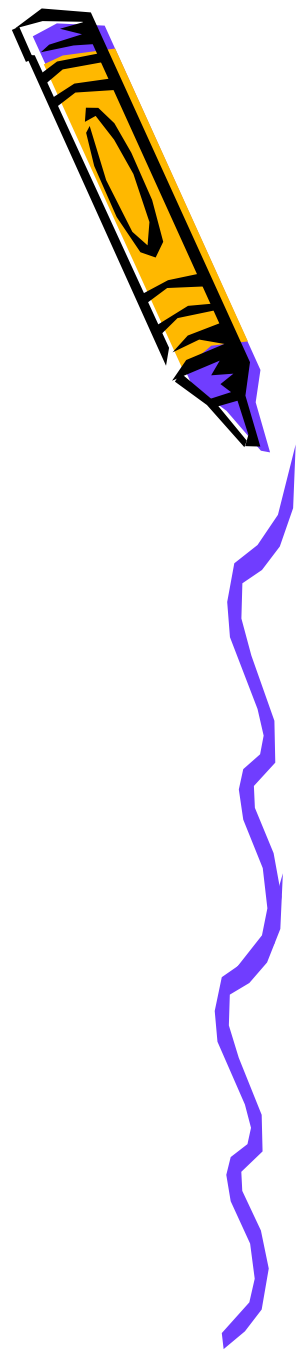

# But then, where is Science?

- Maybe, in Art?
- Can they be together?

We decided to ask Jenny  
**LUCANDER** , a book illustrator  
from Finland.

# Jenny says that it's true!

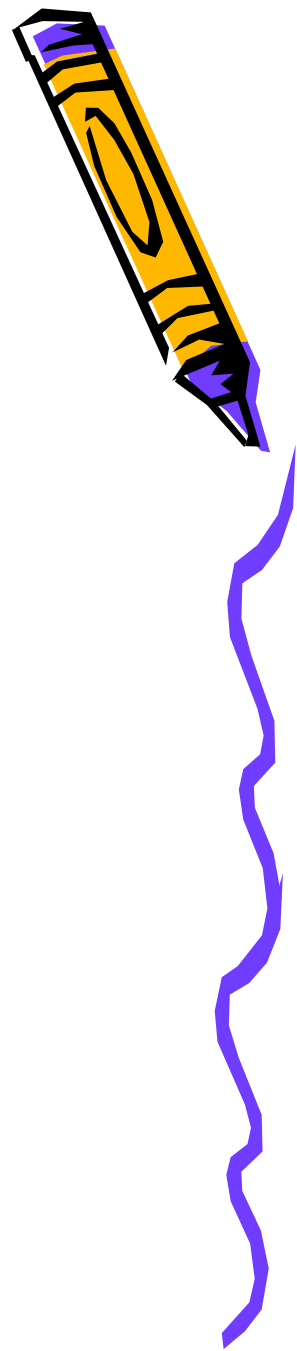

# How we found it out 😊

- the ScienceGirls team had a wonderful opportunity to try themselves as

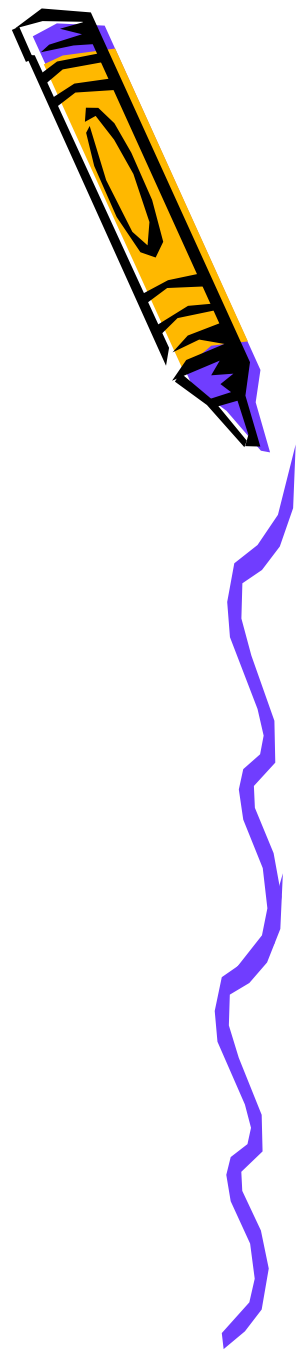

illustrators,

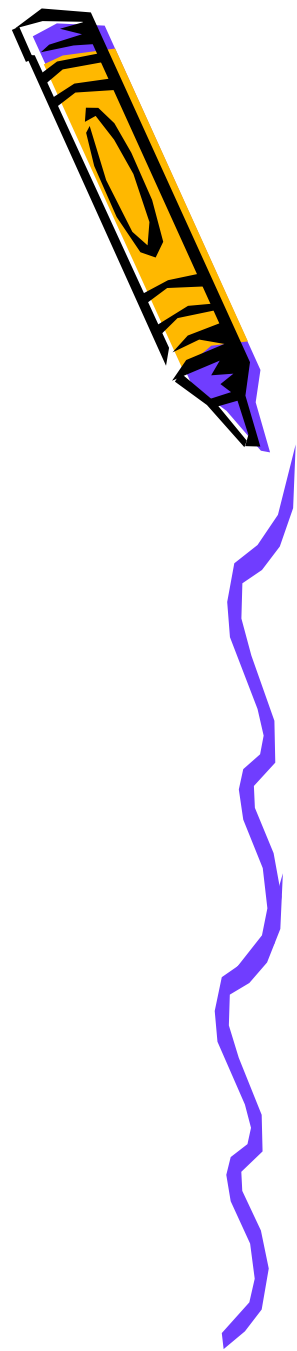

creators,

# colour technicians and scientists in art

And we loved it!

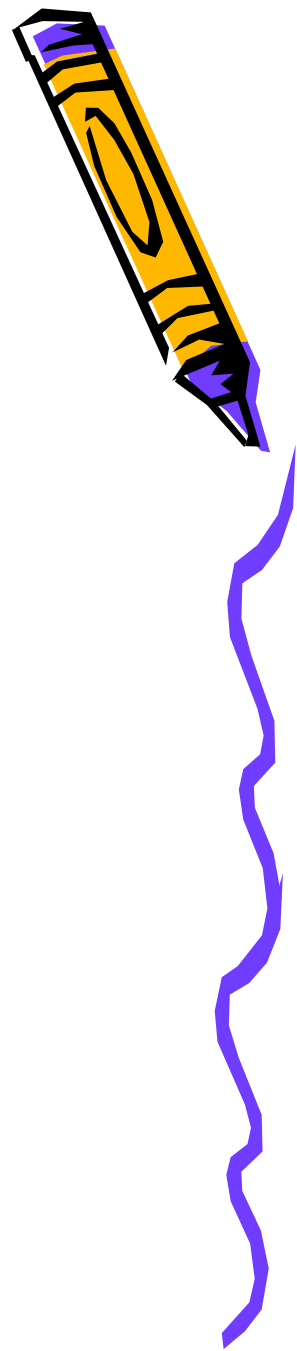

# Another search for attractive science

- Travelling into space...

# Trip to Vilnius University planetarium

# You just imagine!

# A real satellite?

And what is this?

# A student for one day?

- That's cool! I can't wait!

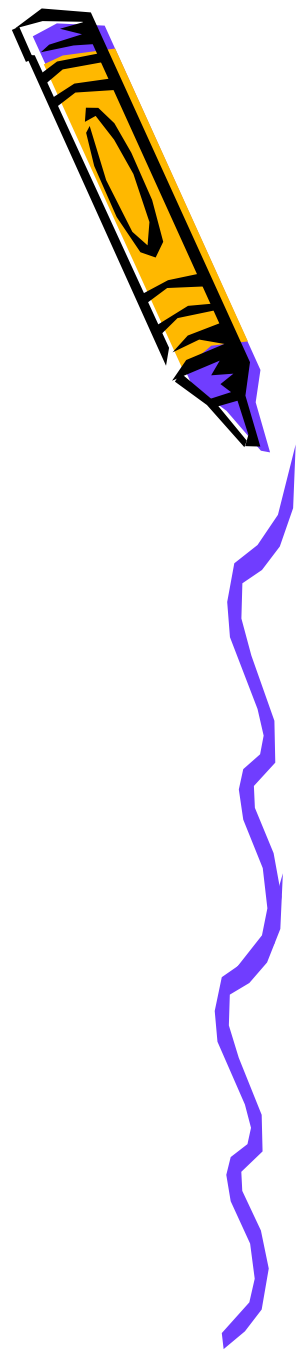

# Lecture-workshop at Vilnius University Geology, Mineralogy and Paleontology Department

# Hurrying for the lecture😊

The story how diamonds  
appear is worth bearing in  
mind...

# Feel like real scientists😊

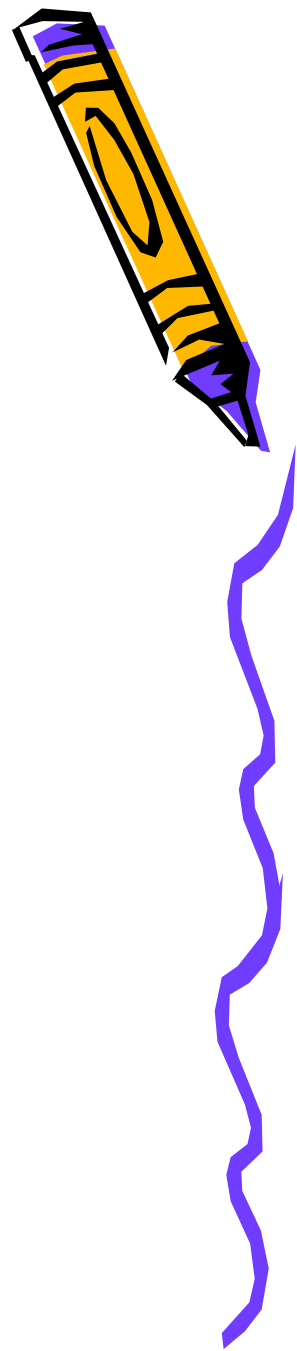

Oh, Yes! Now I can see!

# Science and Photography

- SHOW THE WORLD HOW YOU  
CREATIVELY SHARE YOUR SCIENCE!

# Activity the "Science Image Contest"

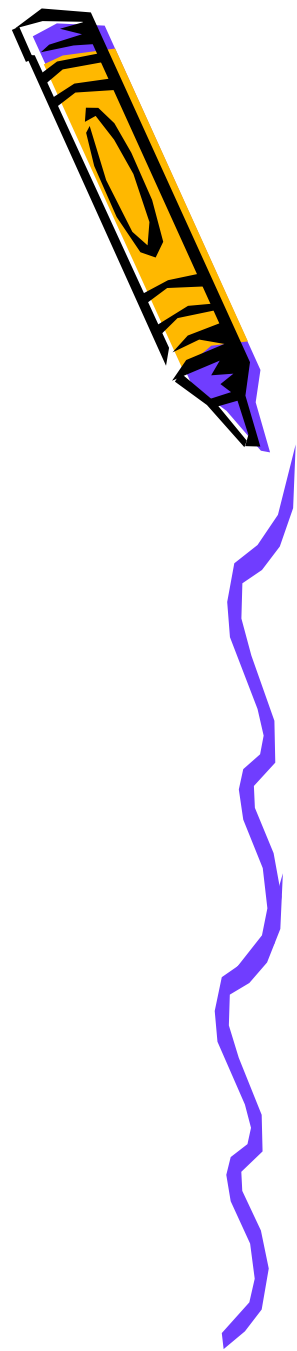

- We were asked to "recognize" Science in our everyday life by photographing and taking part in the „Science Image Contest“
- By doing this we want to tell everybody about our scientific feelings and share them in the most creative way.
- Here are some of the best photos by our girls:

A great image can capture a  
moment,

communicate a message,

and stir emotion ...

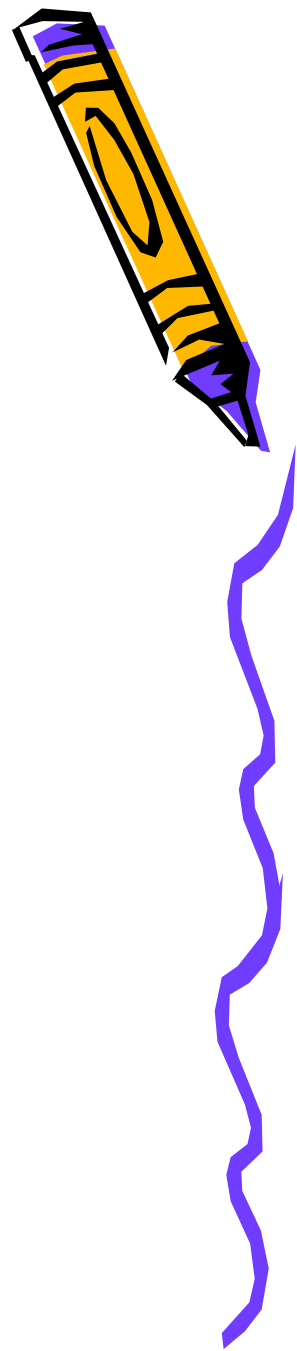

It is a way to share and communicate  
our science with the others...

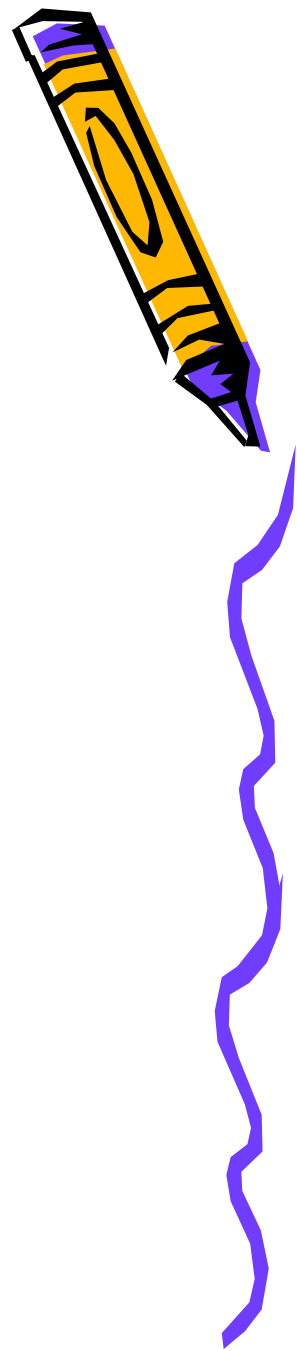

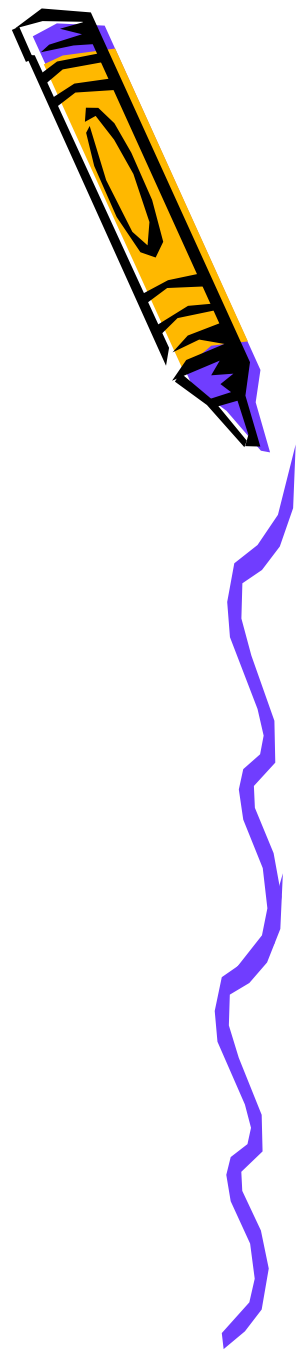

We become curious and  
more😊,

Self confident😊,

And Amazing!

Feel Free,

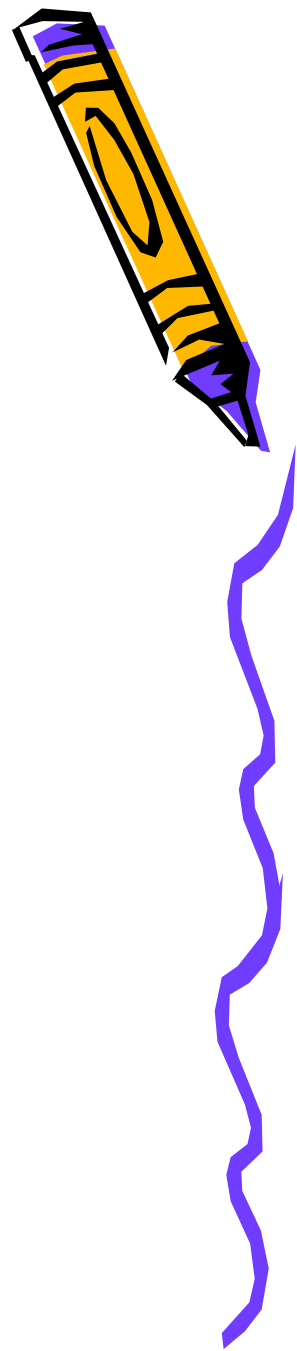

Mature,

And easy-going😊

And Here is what we have  
learned!:

- It seems that scientists can't be described only in terms of what they look like or what they do - so perhaps a better description encompasses how scientists think.

I see...

I think...

I wonder...

SO....

# Is it about us?

- Time will show...

# ScienceGirls' Expectations:

"You are always learning something new and you can use what you learn to make changes to things that are important to you"

We want to be a part of it!
